DETAILED ACTION

Response to Amendment

The examiner is receipt of applicant's response to office action mailed 7/6/2004, which was received 7/28/2004. Acknowledgment is made to the withdrawal of claims 2-91, the cancellation of claim 1 and the addition of claims 92-111. The amendment has been carefully considered and is subject to an election/restriction of the newly added claims. Please note that no arguments were presented in the latest response.

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Group I – 92-96

Group II – 92-94,98

Group II – 92,97

Group II – 92-94,99

Group II – 92-94,100,101

Group II – 92-94,102

Group II – 92-94,103

Group II – 92-94,104

Group II – 92-94,105

Group II – 92-94,106,107

Group II – 92-94,108

Group II – 92-94,109

Group II – 92-94,110

Group II – 92-111

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: 92.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The species contain features which offer divergent elements to the base claim.
